

Community Outreach Program Guide Sheet for August

Welcome Auxiliary members,

Community Outreach is a little different from community service in that your auxiliary members volunteer with other organizations in your community. It's about a donation of your time, not a donation of money. It's about service with other organizations and offers us another way to help improve where we live and to let the community know who we are and what we can do for them.

This year they have added the initiative of volunteering with a group of an organization that supports first responders. We all know how much a lot of the first responders have been working over the last year during the pandemic, they give so much to our community and deserve a helping hand.

At school of instruction, I will have examples of ways to help you get started volunteering out in the community.
